

La Marzocco Technical Bulletin #110

New Vulcano Hoppers

We are pleased to introduce the new Vulcano hopper, which fits both the Vulcano Automatic and Vulcano On-Demand grinders.

The shape of the inlet hole has been modified to facilitate easier loading of coffee. The new grid (shown on left) is positioned a step below the rim unlike the previous design (shown on right) and includes the same geometry as that of the Vulcano Swift hopper.

The new spare part is already available for order through the Parts Department, with the unmodified code M.1.004

We introduced the new hopper on Vulcano On-Demand and Vulcano Automatic starting from SN1431544.

Please do not hesitate to contact our solutions team with any questions you have about this update.
