La Marzocco Technical Bulletin #114

Linea PB steam knob

We would like to inform you that Linea PB steam knob has been recently modified.

The new knob is partially hollow. This allows the surface to remain 10°C cooler while the valve is open, and to cool down again faster after closing; the exterior shape has not changed.

We introduced the new knobs on machines starting from serial number PB002101.

The spare part is available for order through the parts department with code:
F.1.034.01 LINEA PB STEAM VALVE KNOB

Please do not hesitate to contact our solutions team with any questions you have about this update.
