

La Marzocco Technical Bulletin #123

Spade Terminal Cover, New Material

We are pleased to inform you that the spade terminal cover has been changed on all steam boiler thermostats. The new cover material is black and has a higher temperature resistance.

Please pay attention when connecting and disconnecting the thermostat, as the new cover, even though more resistant to temperature, is more fragile and could crack if not handled correctly.

The new part equips all Linea, Linea PB, Strada, GS3 starting from serial numbers:

L049004

PB004173

ST002495

GS006353

and will gradually equip all GB5/fb80.

Please do not hesitate to contact our solutions team with any questions you have about this update.
